ABOUT ME

I began with my lecture on Information Systems, from which I like programming, and my first programming is Desktop Programming (C #), along with technological developments, I finally started liking websites, which then I freed myself from the company to continue the Learning Section Full-Stack Web Developer, I attended training with a duration of 4 months and I am sure with this knowledge will be very useful for the future. now I have already worked with a manufacturing company, and a coding school company with learned from my experience.
